# How can we enhance Sustainable Skipjack Resources Management with Industry-Government-Acad emia Initiatives?

Gain insight to an essence of  
sustainable skipjack resources management  
through scientific approach and industrial  
promotion activities from the practice  
and experience of Japan.

## Outline

This program is designed for the administrative organization and its administrators from India and Maldives to recognize the current status and issues of skipjack resources based on scientific research and analysis, understand the industry-academia-government initiatives implemented in Kochi, Japan for skipjack resource management, and consider how to improve skipjack resources management in their countries.

All sessions are conducted in English and ONLINE.

The period of the program is from November 4th to November 21st, 2022.

Course Capacity is basically 12 participants including 7 from India and 5 participants from Maldives.

## **JICA Knowledge Co-Creation Program (KCCP)' as a New Start**

In the Development Cooperation Charter which was released from the Japanese Cabinet on February 2015, it is clearly pointed out that "In its development cooperation, Japan has maintained the spirit of jointly creating things that suit partner countries while respecting ownership, intentions and intrinsic characteristics of the country concerned based on a field-oriented approach through dialogue and collaboration. It has also maintained the approach of building reciprocal relationships with developing countries in which both sides learn from each other and grow and develop together." We believe that this 'Knowledge Co-Creation Program' will serve as a center of mutual learning process.

For "Knowledge Co-Creation Program (Young Leaders)", young leaders, who will become nation-building leaders in the future, are provided with opportunities to:

- 1) develop their specialties through experiencing and learning technologies and skills in Japan, and
- 2) increase their willingness to resolve issues on their own.
