Introduction

Earth Observation satellites launched over past few decades provide us periodically synoptic and systematic information pertaining to land, ocean and atmosphere and several aspects of environment. This information is a key ingredient in the programmes of the government at the Centre and State towards ensuring food and water security, monitoring and management of natural resources, monitoring of our environment and eco-system, forecasting weather and disaster management support, planning and monitoring of developmental activities, and information for better governance. Geographical Information Systems (GIS) using satellite images, ancillary data and models can play critical role in all spheres of natural resource governance and developmental activities. Amidst all developments in Earth Observation and geospatial technology, resource managers and decision makers often wonder from where to obtain relevant data; how to process and extract relevant information; what are the constraints and time scales; how to train their working level personnel. This course focusses on strengthening the technical skills and knowledge of senior functionaries in governance, academia, industry and entrepreneurs on geospatial technology and its applications.

About the IIRS

Indian Institute of Remote Sensing (IIRS) is a premier institute with a primary aim to build capacity in Remote Sensing and Geoinformatics technologies and their applications through training & education, research and outreach programmes. IIRS is a Centre of Indian Space Research Organisation (ISRO), Department of Space, Government of India. Formerly known as Indian Photo-Interpretation Institute (IPI), founded in 1966, the Institute is the first of its kind in Remote Sensing in entire South-East Asia. While nurturing its primary endeavour to build capacity among the user community by training mid-career professionals since its inception in 1966, the Institute has enhanced its programmes to meet the requirements of various stakeholders, ranging from fresh graduates to policy makers including academia, industry, different government departments and NGOs. For more details please visit IIRS official website at- <https://www.iirs.gov.in>

Significance of the Course

DIGITAL GOVERNMENT TRANSFORMATION

21 TO 25 SEPTEMBER 2026

Jointly Sponsored by the

SINGAPORE COOPERATION PROGRAMME

and the

THAILAND INTERNATIONAL COOPERATION AGENCY

under the

SINGAPORE-THAILAND THIRD COUNTRY TRAINING PROGRAMME

Singapore Cooperation Programme

Singapore has provided technical assistance to other developing countries since the 1960s. As a country whose only resource is its people, Singapore believes that human resource development is vital for economic and social progress. Singapore itself has benefited from training provided by other countries and international organisations.

In 1992, the Singapore Cooperation Programme (SCP) was established to bring together under one framework the various technical assistance programmes offered by Singapore. Through the SCP, the range and number of training programmes were increased to share Singapore's development experience with other developing countries.

To date, over 160,000 officials from more than 180 countries, territories, and intergovernmental organisations have participated in our courses and study visits. The SCP is managed by the Development Partnerships Directorate (DPD) of the Ministry of Foreign Affairs, Singapore.

Thailand International Cooperation Agency (TICA), Ministry of Foreign Affairs, Thailand

TICA is a national focal point for Thailand's international development cooperation. It was established in 2004 to realise Thailand's aspiration to be a contributor to international development cooperation. Believing that global challenges are best addressed through international cooperation and global partnership, TICA continues to work closely together with its development partners to realise the global development agenda through various capacity-building and human resources development programmes. In response to the recent changes in the global landscape of development cooperation, TICA has strengthened its partnerships to harness the synergy of South-South and Triangular Cooperation to tackle global development challenges, including expediting the implementation of Sustainable Development Goals (SDGs). It also continues to realign our focuses in order to deliver Thailand's commitments as a reliable global partner.

Since 1991, TICA, in collaboration with educational institutions in Thailand, has offered short-term training courses under its Annual International Training Course (AITC) programme. The number of

courses offered each year varies between 25 to 35 courses for 20 to 35 participants per course.

AITC not only fosters good and friendly relations which Thailand has already enjoyed with recipient countries across regions, but also helps Thailand to reach out to those countries with which we desire to engage more closely. The courses offered by TICA in 2026 are categorised into 7 themes: Sufficiency Economy Philosophy (SEP) for SGDs, Agriculture and Food Security, Health and Wellness, Climate Resilience, Trade and Economy, Inclusive Development, and Science, Technology and Innovation (STI) for Development.

Singapore-Thailand Third Country Training Programme (TCTP)

Since 1997, the Development Partnerships Directorate of the Singapore Ministry of Foreign Affairs has collaborated with TICA to extend technical assistance under the Singapore-Thailand TCTP. As partners in the technical cooperation cluster under the Civil Service Exchange Programme (CSEP), we conduct an annual review of the TCTP and renew our commitment to jointly share our experience and expertise with our ASEAN friends.

To date, more than 1,100 government officials from ASEAN Secretariat, ASEAN and Timor-Leste have participated in our training courses conducted in the areas of economic, environment and urban development, as well as public administration.

TRAINING PROGRAMME ON DISASTER MITIGATION & MITIGATION FUND

**DATE: 22- 25 JUNE,
2025**

**VENUE: NIDM, ROHINI,
DELHI**

National Institute of Disaster Management
Ministry of Home Affairs, Government of India

I. Introduction

India is one of the most disaster-prone countries in the world, exposed to a wide spectrum of natural and man-made hazards including floods, earthquakes, cyclones, landslides, droughts and industrial accidents. The Disaster Management Act, 2005, enacted by the Government of India, established a comprehensive institutional framework for disaster management with a clear mandate for Prevention, Mitigation, Preparedness, Response, Relief, Rehabilitation and Reconstruction. The National Disaster Management Authority (NDMA), under the Chairmanship of the Prime Minister, is the apex body responsible for laying down policies, plans and guidelines for disaster management in the country.

A significant policy shift has been witnessed at the national level, moving away from a purely relief-centric approach towards a proactive, holistic and integrated disaster risk reduction (DRR) strategy. Mitigation has been accorded special emphasis under the National Disaster Management Plan (NDMP) 2016, which is aligned with the Sendai Framework for Disaster Risk Reduction 2015–2030. The Sendai Framework prioritizes investing in disaster risk reduction to enhance resilience, and India has progressively aligned its policies accordingly.

A critical enabler for disaster mitigation is dedicated and ring-fenced financing. The Disaster Management Act, 2005, envisages the establishment of the National Disaster Mitigation Fund (NDMF) and State Disaster Mitigation Funds (SDMFs) at the national and state levels respectively. These funds, operationalized through guidelines issued by the Ministry of Home Affairs (MHA), are intended to finance long-term structural and non-structural mitigation measures. The 15th & 16th Finance Commission recommended enhanced allocations and operationalization of these funds, underlining their centrality to risk-informed development.

In recent years, the Sixteenth Finance Commission has further reinforced the importance of disaster risk reduction by recommending enhanced financial devolution and dedicated allocations for disaster management, including mitigation-focused interventions. The Commission has emphasized strengthening fiscal frameworks for disaster resilience, promoting risk-informed development, and ensuring that mitigation investments are prioritized alongside response and recovery. Mitigation measures, when integrated into development planning, significantly reduce disaster risks and associated losses. Strengthening institutional understanding of mitigation

3. To formulate the Detailed Project Report (DPR) in funding mechanism.
4. To strengthen participants' capacity to integrate mitigation measures into development planning and sectoral policies.
